

To Whomsoever it May Concern

I have gone through the innovative teaching methods used by the faculty of Electronics and Communication Engineering Department, Atria Institute of Technology, Bengaluru. The methods like Role Play, Group Discussion, Charts, Mini projects, Seminars will help students all the students to have good understanding of the course. The use of ICT and the various student development activities will help all the students will increase the employability. The add on programs and the cluster activities introduced in the department is a good initiative taken by the department. The professional societies activities will add the leadership quality among the members and enhance their knowledge in various domain.

The more technical platform likes MOOCs should be encouraged be used for the innovation in teaching. The various activities such as project-based learning, soft skill training, mini projects and participation in various competitive events need to be encouraged more.

I wish all the best to the department for the continuous improvement in the teaching learning pedagogy.

Thanking You

Dr. Maya V Karki

Professor & Head
Dept. of Electronics & Communication Engg.
