

Atria Institute of Technology signs MoU with MetaCog Solutions Pvt. Ltd.

Atria Institute of Technology has joined hands with MetaCog in a quest to improve executive education in the field of Supply Chain Management and Logistics. The MoU allows both the institutions to share knowledge and talent pool for better education practices and job opportunities.

MetaCog Solutions Pvt Ltd, is a professionally managed skill development company with a focus on providing comprehensive technology-based training in the areas of supply chain, quality and operations management. The company's customers are leading organizations from the automotive industry, pharmaceuticals, healthcare and global supply chain outsourcing. MetaCog offers programmes with assessment and certification partners including the Automotive Skill Development Council (ASDC) and the Indian Institute of Materials Management, Chennai.

SCM is one of the fastest growing fields worldwide. There is a significant demand for supply chain positions in National and International businesses. Some of the career opportunities offered in the field of SCM and Logistics are Vendor Development Executive, Customer Quality Assurance Manager, Warehouse Manager, Supply Chain Analyst and Logistics Executive.

Both the institutions together will offer executive education in the field of SCM and Logistics. The course will cover current topics like Customer quality, Strategic Sourcing and Vendor Management. Courses offered will be certified by National Skill Development Corporation (NSDC). The course gives option to acquire additional international certifications- Automotive Skills Development Council (ASDC) and International Diploma. The focus of the course will be- end to end supply chain and operations management, critical techniques to analyse supply chain, practical approach to manage supply chain issues, use of enterprise applications to solve SCM problems. The course will help experienced professionals working in the field of sourcing, procurement, vendor development, quality management, materials planning, warehouse/ stores and spare parts.
