Course Overview

Cisco Networking Academy is an innovative education initiative which aims to deliver a better career through information and communication technology skills. With the ever growing digitization, it has become necessary to have the skill set to secure devices. Nowadays cyber security is becoming an even more stringent requirement and warned by organizations and companies all over the world. This introductory course to Cybersecurity is designed to explore it as a potential specialization in an IT career. This course was first of the three level course consisting a total of five modules, each designed to throw light on the need for Cybersecurity, the basic concepts and terms used in the industry, different types of malware and attacks, data protection and privacy, and the future in Cybersecurity. As part of the requirements for completing this course, students were assessed based on quizzes, activities and labs that were part of each module. In order to obtain a certificate of completion, students took up an exam covering the Introduction to Cybersecurity 2.0 curriculum.
