

3 DAYS FDP ON RESEARCH METHODOLOGIES AND LATEX, A TYPE SETTING SOFTWARE

August 22-24, 2019

The 3-day workshop on Research methodologies and Latex intends to provide an overview of the different research avenues available.

The first day will cater to information regarding interdisciplinary projects, development of projects to products and research in projects and guidelines for faculty pursuing PhD and those who intend to take up PhD. Submission of work to conferences and journals and the quality of such conferences and journals will also be addressed.

Latex is a type setting software which is generally used in submission of papers and related documentation. The second day will provide an insight into the Latex software and its salient features with hands-on sessions. The third day will provide information and steps to use Latex to complete an IEEE paper in Latex, followed by a small team based exercise to recollect the use of Latex.
