Department of Basic Sciences Engineering & Humanities

LANGUAGE LAB OF BASIC SCIENCE DEPARTMENT

The language lab of the department is a dedicated space where the first year students have access to audio-visual materials to enhance their English Language Learning Skills. Using the ORELL's iTELL Language Software, the lab provides variety from regular classroom situations. The main objective of the lab is to use visual stimulus coupled with selective audio materials to improve the communication skills of the students.

The lab is equipped with nearly 70 systems which caters to improving the LSRW skills of aspiring engineers. It serves as a tool to train students on discursive language, with real examples pertaining to daily usage. Students are well-guided by the English tutor and lab instructor in different communicative areas such as academic vocabulary, coverage on Phonetics, practice activities in the genre of General Grammar, special activities to overcome Mother Tongue Influence and other exercises pertaining to the syllabus.
